

# CARDBOARD CARTONS AND BULKA-BAGS

## **CARTONS**

### **SOURCE**

Either from Vietnamese manufactured or imported carton paper.

### **CARTON/CARDBOARD TYPES**

Can be supplied in either 3 or 5 ply cardboard in various thicknesses and qualities to match client samples, with or without internal dividers.

### **COLOURS**

Cartons are supplied either in plain tan color, or with white or colored exterior colored paper, with 1, 2, 3, or 4 color printing to customer specifications.

### **GLUE TYPES**

To customer requirements

### **PACKAGING**

Depending on carton size/quality, usually in 10 to 20 carton strapped bundles, either palletized or non-palletized.

Because cartons are light in mass for their volume, AICO ships cartons in composite load-outs to two different customers in the same country, usually with structural steel, or some other heavier commodity in the bottom of the container to one of the customers. Both commodities are completely separated.

This allows AICO to maximize both cargo tonnage at about 26 tones for a 40' container, and volume at about 63 cubic meters for the most efficient return on transportation charges.

Cartons above the second commodity are always protected by a layer of plywood, and are unloaded first. The container is then delivered to the second customer for the removal of the second commodity.

### **CARTON AVAILABILITY FOR SHIPPING**

Generally 7 to 10 days after customer order, but depending on the printing requirement.

## **OTHER PACKAGING AVAILABLE**

### **BULKA-BAGS**

Woven PE shipping bulka-bags with or without top covers or bottom shutes, with slinging straps in 2 or 4 corner arrangements, internally lined with PE, or breathable, strongly stitched with re-inforced edges and corners to 2 cubic meter volumes and 1200 kg bag capacities.

### **PLASTIC BAGS**

Plastic bags of all types and thicknesses - single or multiple laminates in PE, PVC, LDPE, and HDPE to general or food grade standards.

### **FOIL-TYPE BLADDERS**

Silver foil-type multiple-laminate bladders with non-drip plastic valves or valve sockets, with internal volumes from 4 liters to 1000 liters are available at very competitive prices.

### **SUPERMARKET BAGS**

AICO can supply supermarket bags in all sizes and types in paper or plastic, plain, or printed in multiple colors.
